

DataBox Allround toploader

A notebook and printer in a pilot's case. A practical but elegant solution.

When working with the DataBox the printer and power supply unit remain completely cabled within the aluminium casing. This is the Dicota 'Floor to Desk' concept. The only table space needed is for the notebook whilst the printer can sit on the floor in the case. Data can either be transmitted by printer cable or via Bluetooth.

The DataBox Allround fits notebooks up to 15" and the following printers: HP DJ 450, HP DJ 460, Canon i70/ i80, Canon iP90, Canon BJ 70-85 series (also with 'Portable Kit'), Olivetti Nomadjet. The most effective means of mounting the printer is with the custom designed 'QuickFix' mount (optional). The rechargeable batteries and printer are recharged via the socket on the case exterior.

The DataBox Allround features a removable exterior Koskin pocket for documents, removable nylon notebook 'bag' for protection of the notebook when transported without the DataBox Allround.

Specification:

Colour:	Black
Dimensions:	420mm x 365mm x 200mm OR 16.5" x 14.4" x 7.9"
Weight:	3.9kg
